## Phlebotomy service at the Old Wanstead Hospital

We are committed to providing a high quality phlebotomy service at Old Wanstead Hospital.

Unfortunately, due to an issue with the boiler, we are temporarily asking patients to attend Whipps Cross Hospital's outpatients area 1.

We can assure patients that this is a temporary issue and as soon as the problem is fixed the service will reopen. There are no plans to stop offering this important service at the unit.

We apologise for any inconvenience caused and are working closely with the local Clinical Commissioning Group and the owners of the building to resolve the issue as soon as possible.
